Dear Sirs,

Ref: Weighwell Portable Train Weigher

We confirm that since purchasing the Static PTW from Weighwell two years ago we have used it on a regular basis to weigh our trains and have found it to be accurate, reliable and maintenance free.

As well as enabling us to weigh trains off-site, the portability provides us with the flexibility to weigh trains at other locations on-site when our non-portable weighing facilities are inaccessible or otherwise occupied.

As a result, the system has proven to be an invaluable asset to our business.

I have no hesitation in providing a reference for this system.

Yours faithfully,

Nichoias Hunt
Site Weights Engineer
