Recommendation for Portable Train Weigher

We at Serco Railtest Ltd have used Weighwell's Portable Train Weigher (PTW) on a number of occasions in the recent past and have no hesitation in recommending it. It is easily portable and can be assembled in the track in a matter of minutes. The instruction manual is very comprehensive and easy to follow.

Several of our staff have been passed as competent to use the PTW and have weighed a range of vehicles from locomotives to light rail vehicles and have compared its accuracy against that of our own weighbridge with very satisfactory results.

Should you require any further information please do not hesitate to get in touch.

Regards,

Dave Coxon
